## Instructions for ironing on rhinestone applications

### Preparation:

- ① A working iron
- ② One washed and dry garment of your choice  
*Do not use heat sensitive materials (such as. 100% polyester, 100% nylon, leather, etc.) garments wash beforehand without fabric softener or liquid detergent!*
- ③ 2 pieces backing paper (or cotton cloths)  
*For use as a separating layer between the iron and the ironing pattern and as a separating layer in the garment.*
- ④ Smooth surface as substrate e.g. ceramic hob  
*Do not use an ironing board!*

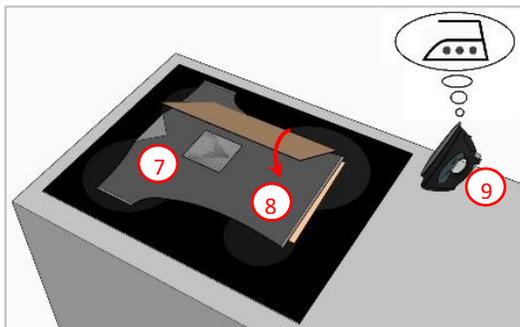

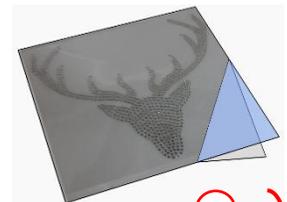

### Procedure:

- ⑤ Lay garment on a smooth surface without wrinkles. For thin T-shirts, place a cotton towel/baking paper between the layers of clothing.

- ⑥ Carefully peel the foils of the rhinestone application from each other.

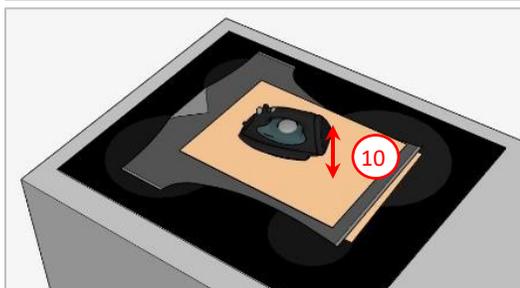

*Make sure that no rhinestones slip out of place. If a stone does slip, you can still correct this now*

- ⑦ Position the clear film with the rhinestones on the desired part of your garment.

- ⑧ Place cotton cloth/baking paper on the iron-on image.

- ⑨ Preheat iron on level 3, cotton/linen, WITHOUT steam. For transfer presses 155-160 °C.

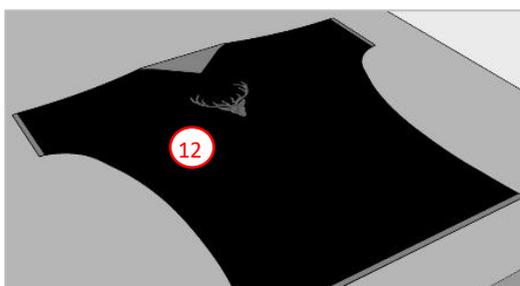

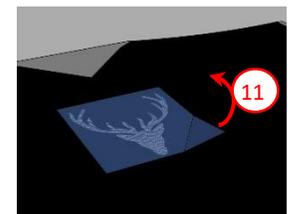

- ⑩ Press the iron on each part of the application for at least 20 seconds.

*Make sure that you place the iron on the application again and again and do not move the iron back and forth, otherwise the stones could slip..*

- ⑪ Only when everything has cooled down, the transparent foil is carefully removed.

*Please check the temperature with your hand.*

- ⑫ Finally, test with the fingernail whether the stones are firmly seated.

*If the rhinestones are still loose, repeat the ironing process again.*

We wish you a lot of fun with our rhinestone applications.

**Care instructions:** Textiles can be washed inside out in the washing machine at 40 °C. Do not use a dryer!

*Ironing should only be carried out by adults, because there is a risk of burning yourself!*

*No guarantee is assumed for these ironing instructions. Liability for improper ironing as well as for consequential damage to the garments/materials/textiles used is generally excluded.*
